

For Immediate Release: March 25th, 2021

Virox Technologies® Launches Industry-First Infection Prevention Guide for Cannabis Facilities

Answering the call for evidence-based guidance on cleaning and disinfection for licensed producers.

Oakville, Ontario: Another milestone has been reached in the Canadian cannabis industry as Virox® Technologies, makers of SHYIELD™ introduced a new guide aimed at supporting licensed producers in achieving the high standards for cleaning and disinfection set out by regulators.

While the industry sets high compliance standards for disinfection, little guidance exists on how to achieve this. Infection Prevention for Cannabis Facilities: Cleaning and Disinfection Guide, developed in consultation with experts and backed by peer-reviewed research provides important information and easy-to-implement steps to prevent common infections that can have costly consequences for cannabis facilities.

This guide lays out the fundamentals of effective infection prevention, specifically through the lens of cannabis facilities – making it an especially relevant and essential resource.

From protecting plant health to human health, the guide aims to equip key stakeholders to make informed decisions about their infection prevention protocols and feel confident that they have created the ideal environment for their employees and their yields.

The guide contains:

- Cleaning and disinfection overview
- 7 steps for optimizing infection prevention
- How to select the ideal disinfectant
- 10 common disinfection mistakes and how to avoid them
- Correct use and validation of disinfection methods

The guide is intended to be a resource to raise awareness within the cannabis community around infection prevention and the proper use of disinfectants. As an industry still in its infancy, we want to empower facilities to review and improve current protocols for cleaning and disinfection.

“This disinfection guide is a valuable tool to have in every cannabis quality professional's toolbox.”

- **Sacha Hockenhill, Head of the C45 Association**

“This booklet is a great head-start for new or existing growers from a very credible source.”

- **George Dickinson, Co-Founder & Consultant of Growhaus Projects (formerly known as CannaPro)**

“The disinfection guide provides a great foundation for a proactive and effective sanitation program.”

- **Jarred Marsh, Licensed Producer Consultant at CCS Green**
