

FOR IMMEDIATE RELEASE:

Virox® Technologies Inc. and Mobius Trimmer Announce Compatibility Between SHYIELD™ Disinfectants and Mobius Post-Harvest Equipment

Oakville, Ontario (May 13, 2020) – Virox® Technologies Inc. and Mobius Trimmer are excited to announce that the SHYIELD™ Disinfectant portfolio developed and manufactured by Virox are the preferred disinfectant products for use with Mobius post-harvest equipment and accessories. The SHYIELD™ disinfectants include a Concentrated Liquid, Ready-to-Use (RTU) Liquid, and Pre-Saturated Wipes.

After many tests both in the field and in-lab, Virox and Mobius have deemed that Accelerated Hydrogen Peroxide® (AHP®), the technology that powers SHYIELD™ disinfectants, is compatible with all major components of Mobius post-harvest equipment and accessories.

Mobius manufactures the world's best cannabis and hemp trimmers and processing equipment. Engineered for ease of use, scalable output, and safety, they disassemble by hand in minutes and are so simple to clean that they easily accommodate GMP workflows.

SHYIELD™ disinfectants are registered with Health Canada as one-step disinfectant cleaners, and are specifically designed by Virox for the Cannabis industry using their patented AHP® technology.

For more information and details on recommended protocols, please visit [SHYIELD.ca/contact-us](https://shyield.ca/contact-us) and for more information on Mobius equipment, please visit www.mobiustrimmer.com.

Best Regards,
